Summary

Innovative .NET developer with a strong background in Angular frontend development and 2 years of industry experience. Complemented by a keen interest in data analysis and ETL, I excel at leveraging data insights to inform business decisions and drive success.

Skills

- **Technologies and Frameworks:** .Net core web Api, Angular, Kendo UI, jQuery, .Net framework MVC, Entity Framework, LINQ
- **Database and Tools:** SQL Server, SSIS, SSAS, Power BI, Excel, Git, GitHub
- **Programming Languages:** C#, Type script, Java script, SQL, MDX, Python
- **Data Engineering Tools:** ETL Tools (Data Warehousing), OLAP Cube, Data visualization

Professional Experiences

.Net/Angular/ETL Developer

July. 2023 – May. 2024

Areem network services | Tunisia, Gabes (Remote)

- Modeled data warehouse structures for efficient data storage and retrieval using SSIS
- Developed OLAP Cubes with SQL server Analysis services (SSAS) for advanced data analysis
- Created a dynamic and interactive reporting application using .Net Core web API and Angular, enhancing decision-making capabilities

.Net web framework MVC developer

Nov. 2022 – April. 2023

Steros | Tunisia, Sfax

- Developed and integrated medical modules into STEROS Lab
- Enhancing traceability and quality assurance in healthcare
- Functional testing: ensuring seamless user experiences and healthcare compliance
- Technologies: c#, .Net framework MVC, LINQ, Kendo UI, SonarQube, SVN, Redmine, SQL server

Intern-.Net/Bi developer (Master's Degree)

Feb. 2022 – May. 2022

Acteol | Tunisia, Sfax

Project: MDX Query Builder: web application for sales and KPI Analysis

- Develop an intuitive MDX queries that allows users to create custom queries with ease
- Design a seamless user experience with dynamic visualization and pivot table capabilities
- Develop dynamic reporting system that allows users to manage reports with ease
- Technologies: .Net Web framework MVC, jQuery, Html, Kendo UI, MDX, SQL, Excel

Intern-.Net/Bi developer (License Degree)

Feb. 2020 – June. 2020

Acteol | Tunisia, Sfax

Project: Development of WPF application for business intelligence solution

- Extract, Transform, Load data into data warehouse star schema
- Develop desktop application to empower account manager to comfortably manage OLAP cubes (star schema), perform tasks independently without relying on superior data engineers
- Visualize statistical results of efforts, providing actionable insights and trends
- Technologies: .Net WPF, MVVM, c#, Metro framework, MDX, SQL, Excel, SSIS, Power BI, SSAS

Education

Master's in computer science and data engineering

2020 – 2022 | Tunisia-

Sfax

Faculty of Science and Economics, University of Sfax

License in Computer Science and Economics

2016 – 2020 | Tunisia-Sfax

Faculty of Science and Economics, University of Sfax

Baccalaureate in Computer science

2013 – 2016 | Tunisia-Sfax

Henchah high school
